

Syd Hoeper

Senior Product Designer for Geospatial Emergency Response and Complex Data Products

Missoula, Montana | sydhoeper.com | sydhoeper@gmail.com | linkedin.com/in/sydhoeper | 920-858-2889

Professional Summary

Senior Product Designer with 9 years of experience designing geospatial, emergency-response, and complex enterprise products. I create decision-support experiences that help people interpret complex information and act with confidence. My work includes cross-platform emergency-response maps and staffing tools for Active911, data-rich mapping experiences for Campendium, and accessible federal services. I lead from discovery through launch, aligning product, engineering, research, and senior stakeholders around clear product decisions.

Relevant Expertise

Design Leadership Product vision, roadmap influence, design reviews, stakeholder alignment, mentoring

Product Design End-to-end UX and UI, rapid prototyping, product strategy, information architecture

Geospatial and Data Visualization Map interactions, waypoints, navigation, location-aware interfaces, data-rich overlays, spatial UX

Research and Systems User interviews, usability testing, Jobs-to-Be-Done, journey mapping, systems diagrams, design systems

Delivery and Standards Figma, Jira, Mixpanel, AI-assisted prototyping, responsive web, native iOS and Android, WCAG 2.2, Visual Studio Code

Professional Experience

Peter Burr

Principal Experience Designer (Contract) | Remote | May 2026 - June 2026

- Defined the product vision, interaction model, and implementation strategy for an immersive mixed-reality experience, translating complex concepts into intuitive spatial interactions.
- Used Unity, Blender, and AI-assisted workflows to prototype rapidly while leading collaboration across engineering, art, and production and mentoring three interns through launch.

Ad Hoc LLC

Senior Product Designer | Remote | November 2023 - July 2025

- Led product design for complex federal digital services used by hundreds of thousands of people, turning policy-heavy workflows and ambiguous requirements into accessible, shippable experiences.
- Partnered with product managers, engineers, researchers, and agency stakeholders to shape strategy, run discovery, present design decisions, and guide work through implementation.
- Converted a paper-based Veterans Affairs workflow into a streamlined digital application and led design of a National Park Service pass-management platform that modernized internal operations.
- Created systems diagrams and data-journey maps for the Social Security Administration to clarify a complex service ecosystem and support product decisions.
- Synthesized Healthcare.gov usability-testing findings into prioritized improvements that informed future product enhancements.
- Designed within enterprise design systems and WCAG standards, balancing usability, consistency, accessibility, and long-term maintainability.

Roadpass Digital

Product Designer | Remote | December 2021 - June 2023

- Owned product design for Campendium across web, iOS, and Android, using customer feedback, usability testing, and product data to shape the roadmap with product and engineering.
- Redesigned interactive maps and data-rich overlays so campers could interpret location-based information, compare destinations, and make confident trip-planning decisions.
- Translated research findings into product improvements that contributed to a 12.16% increase in quarterly objectives.
- Designed and launched Campendium's campsite-booking platform from the ground up, creating a new revenue stream within the existing product ecosystem.
- Revitalized the property-management system to improve the clarity and efficiency of operational workflows.

Active911

Sole Product Designer | Remote | April 2020 - December 2021

- Owned end-to-end design for a cross-platform emergency-response product across native iOS, native Android, and web, working independently with product and engineering from discovery through launch.
- Designed map interactions, waypoints, navigation workflows, and other critical experiences that supported situational awareness and emergency response.
- Conducted interviews with emergency-response users and applied Jobs-to-Be-Done principles to shape product strategy, simplify workflows, and improve usability.
- Established and maintained a scalable design system that improved consistency and development efficiency across platforms.
- Designed and launched a paid scheduling product that helped first responders manage staffing and shift schedules and created a new source of company growth.
- Initiated research and concept development for a third product, establishing the foundation for future expansion.

Trip Pilot

Sole Product Designer | UI UX Design Intern | Bend, Oregon | October 2017 - April 2020

- Promoted from intern to sole product designer in six months, then led design for a group adventure-planning app in direct partnership with the CEO and developer.
- Designed interactive waypoint creation, map-based trip planning, and location-aware features that simplified collaborative planning and navigation.
- Translated user research into product strategy and iterative prototypes, then redesigned the application to create a more cohesive experience and improve development efficiency.
- Designed and launched a group checklist feature that achieved the highest free-to-paid conversion rate in the app's history.

Additional Experience

CiES

Sole Product Designer (Contract) | Bend, Oregon | July 2018 - February 2019

- Led design of the company's first digital product, translating complex aviation fuel data and business requirements into an intuitive, production-ready application in partnership with the CEO and developers.

Giant Loop Moto

Product Designer and Product Design Marketing Intern | Bend, Oregon | May 2016 - May 2018

- Designed an off-road motorcycle tool roll that expanded the product line and created retail and web assets supporting product visibility and launches.

Education

University of Montana Master of Fine Arts in Game Design and Interactive Media | Expected May 2028 | 4.0 GPA | Big Sky Scholarship

University of Minnesota Twin Cities Bachelor of Science in Individualized Studies | May 2017 | Product Design, Cultural Anthropology, Sustainable Systems Management

Selected Certifications

Figma UI UX Design Advanced, Udemy | Design Accessibility, Uxcel | How to Design for Accessibility WCAG 2.2, Udemy | W3C Introduction to Web Accessibility, edX
